Teacher Guide Games to play! Activities to do!

A Game of 20 Questions

This is an excellent game to play whole class or in small groups. Everyone is involved listening for clues in order to guess the vocabulary word.

- Trading Cards
- Students play in teams or whole class. The objective is to collect the most vocabulary words.

Flashcard Mania

This is a great game to play whole class. Everyone is learning math vocabulary!

- Word and Definition Cards
- Students play in groups of 2 to 8.

The objective is to get the team leader back to the front of the line.

Use the word and definition cards as flashcards for this great game. Divide your class into 2 teams. The objective is to get the team leader back to the front of the line.

Teacher Guide Games to play!

Match it up!

This is a great interactive game. Students insert the word cards into the correct definition envelope. The trading card borders help students make sure their choice is correct. Watch your students practice their Math Vocabulary through play. Everyone is learning math vocabulary!

- Word and Definition Cards
- Trading Cards

Decorate an easel or low wall using the trading cards as a border. Glue the definition cards to the outside of envelopes or library card jackets and staple them onto the bulletin board. Attach the word cards by yarn to the sides of the bulletin board. Students match the word to the definition by inserting the

correct word into the envelope that displays its definition. Students always have a guide by referring to the trading card boards.

Bulletin Board Idea

- Word and Definition Cards
- Trading Cards

Use vocabulary cards as the border for your bulletin board. To introduce the new word, blow up one Vocabulary Word Card and its definition as you present it. Make a copy to introduce the new word to the class, then make a colored copy to add to the board. Progress through each of the 15 words. Your bulletin board will emphasize vocabulary you are working on. After presenting the words, have students in groups make a poster of each word to check their understanding of the definition.

One part of a whole that has been broken into 3 equal parts.

$\frac{1}{3}$

THIRD

One of the objects in a group of 3.

One part of a whole that has been broken into 3 equal parts.

$\frac{1}{3}$

I Know the Word!

This is a great daily routine to build math vocabulary competency in your students.

At the beginning of the week pass out Vocabulary Question sheets and the Vocabulary Question sheet to each student. At the end of the week have each student bring up the trading cards as you pass them out so that each student in the same group have different cards. At the beginning of your Math lesson take 3-5 minutes for the students to practice their vocabulary words.

Students read their word to the class.

Student asks the Vocabulary Question.

Students switch roles and the student who asked the question now answers the question.

At the end of the week each student receives a new card.

half	common denominator	equal parts
equivalent fractions	fourth	fraction
improper fraction	mixed numbers	numerator
proper fraction	simplest form	tenth
third	whole numbers	denominator

This Fraction Math Vocabulary Games packet includes blackline masters to reproduce and use as games and activities.

What teachers like you say:

5.0★ LOVED it, comprehensive and easy to use. Will be using strategies with other content vocab as well.

5.0★. Great ideas and activities for teaching math vocabulary. thanks

5.0. ★ precision is so important! Thank you!

5.0. ★ I LOVED these, and my students did as well! This was a great purchase for the price!

Google Slide Activity

Great for assessment or practice!

HOW TO USE IN GOOGLE CLASSROOM

[Click here for the
Google Slides version!](#)

You can assign this Google Slides™ activity in Google Classroom™.

Make sure you select **make each student a copy** when creating the assignment.

To use the slides the student must be working in **Presentation Mode**.

While in Presentation Mode the student will click on the correct word to match the definition. If they choose correctly, it will take them to the next word. If they select the incorrect answer, they will be taken to a slide that gives an example and allows them to practice defining the word.
